Area of work of each :

IT INDUSTRY

Ward medics : web master by html, css , php

,progres_Mysql,phpmyadmin, dba , IT management because I work at a facility that takes care of the infrastructure of buildings depending on CEO of company. I had to control the lift's technical team to set and change some paths of the electrical circuit inside the lift of the office's building.

Syngenta : System and server admin both linux and windows and android and drone by service now IT ERP , cisco unity , service now , any desk , windows remote desktop , drone setting , management all it equipment and advise and control policy of it of others 4 sites nearly and out side Bangkok . This company has 5 sites around Thailand by I stand by at head office depending on IT COUNTRY MANAGER. I had to remote for the other 2 offices which had a server system on that site for config and had to remote desktop to configure the user's laptop too. I had 2 juniors who had to go to other 2 sites in case of hardware problems.

MSD & Intervet : Depending on Regional manager whom area cover all SEA I am IT management of site , planning and requesting budget both yearly project and short term project , system and service admin by Remedy ERP and budget planning and controlling , **data analyze by google Big Query , SQL , Python by received raw data of sell each 2 times per month. I and Supply chain manager had to approve raw data first before transfer to DBA approved and after DBA approved , I had to updated database of sell by extended update and I had to pull down data by depend on requirements requested from users such as business unit department , MD by SQL and Google Bigquery and had to virtualized some time.** DevOps by excel , colab , jupyter notebook ,aws such as S3 , EC2 , lampda , take care of server and all of infrastructure such as Lan , Wan , AP and yearly maintenance of internet fiber optic upgrade by vender True and AIS , Changed switch's and router of server in case of out of aged and co with NOC and ISP , data engineer about database of sale and customer data too. I had to remote to configure user's laptop and had to remote to database sever on cloud at Singapore area that kept some data to manage some data that incorrect. I had to change switches , routers , and wireless access point on WAN too. I have to control outsource such as lantro(Thailand) to renovate about both LAN and WAN devices in office , I have to control electrical engineers team of building to fixed electricity inside of the office. I have to control air condition servicer to change air condition and fire protection system of server room

Zoetis : Depending on CTO whom sit on USA area , I have to control all infrastructure of office such as server , LAN , WAN , electricities , and it

equipments and VM on azure and **power bi for connect and extract some data** . I work as infrastructure engineer and it assistance of IT manager whom sit on Singapore. I and IT manager are under CTO by IT manager does not respond about the path of infrastructure. I had to report to CTO.

NECTEC : I did DevOp for training about building about AI web application.

Last 6 months of 2022 , IT audit about network operations management of customer whom has more retail shops.

From Syngenta untill IT audit , i was full time of ISET Engineer that co operate both Onsite and ontime with ISET's customers.

Maguro Group : Project management & coordinator about automation and AI with vendors(Accounting and Dynamic 365 Development Central and Azure RDP) and tester about POS system and data base management solution technical. Report IT manager and CPO

Before IT industry

Michael group real estate : Admin & Facility manager by take care of infrastructure of building such as lift , power electric by control engineering team whom services with builder and parking system before turn to legal entity , my company whom was building the office building for sell amount 5 years
