ABOUT ME

Actuarial and
Data Analyst with
over 7 years of insurance
industry experience

proficient in Statistical skills and data management; research methodologies; and big data capture, manipulation, and visualization.

Accomplishments: Cut cost by over 10% from the vendor company in 6 months. Completed BI research that helped pricing team to estimate the loss cost and boost sales by 13%.

EXPERIENCE

Department Manager, Data Warehouse and Data Analytics

The Mall Group / Present

- Manage, maintain Data Warehouse, and ensure that it runs smoothly and properly.
- Clean and integrate large data sets from various sources and ensure that data is accurate and meet the organisation's requirement.
- Interpret data, analyse results by using statistical techniques and provide business needs report.

Associate Data Analytics Manager

Wunderman Thomson Thailand / May 2021 – May 2022

- Kept focus on CRM data results, to raise the flag, when necessary, to wrong data sources for vendors, or changes in trends of results for the client.
- Built and maintained data solutions combining different data sources.

Assistant Manager, Risk Management and Actuary

Sri Ayudhya General Insurance PCL. / December 2015 – May 2018

- Identified, analysed potential risks, and estimated financial consequences. Developed and recommended controls and cost-effective approaches to minimise risks.
- Performed stress-test scenario, using catastrophic model to determine severity flood event.
- Recommended logical database schema and functional system design that created dashboards and advance analytic tools to make business decisions.
- Worked with the end-user to make sure analytics transform data to knowledge in very focused and meaningful way.
- Developed new or adapted insurance products and services according to customer needs in short-term market to gain competitive advantages.

Actuary

Tokio Marine Insurance (Thailand) PCL. / September 2014 - October 2015

- Interpreted the large datasets to conduct GLM and further analysis by using Excel, Access and SAS.
- Created new pricing tools and underwriting guideline for Motor Campaign.
- Assisted Commercial Lines underwriting department in the development of Marine's GWP and review of Public/Product Liability rating structure.

Graduate Trainee

MSIG Insurance (Thailand) PCL. / June 2013 - August 2014

- Analysed insurance pricing model and prepared policy wordings for regulatory approval.
- Underwrote individual casualty applications and balanced risks with sale objectives.
- Created a Product Liability Insurance Guideline to explain in detail regarding underwriting viewpoints and intricate insurance concepts for the company staff.
- Controlled the number of policies when risks are substandard, applied rating to ensure profitable distribution of risks and took part in auditing.

PROFESSIONAL EXAMS

IFoA: Actuarial Statistics (CS1)

Passed October 2020
